

ALPS SERIES

smart central fresh air system

Constant oxygen and
constant net healthy breathing

Whole room
ventilation

Hot and cold
exchange

High pressure
air supply

DC frequency
conversion

Multiple
purification

Mute

Intelligent
adjustment

Real-time
monitoring

24-hour timing

Bypass function

UV
sterilization

APP control

99.99% purification efficiency

99.99% sterilization efficiency

Give the family an extremely pure breathing environment

Enjoy the fresh air of the Alps Forest at home

DECETOMair
Innovative air solution

Higher standard and better quality

HIGHER STANDARDS AND SUPERIOR QUALITY
DERIVED FROM SWISS PROFESSIONAL TECHNOLOGY

Brand DC motor

Can run smoothly for a long time

Environmental protection and energy saving,

Long Life

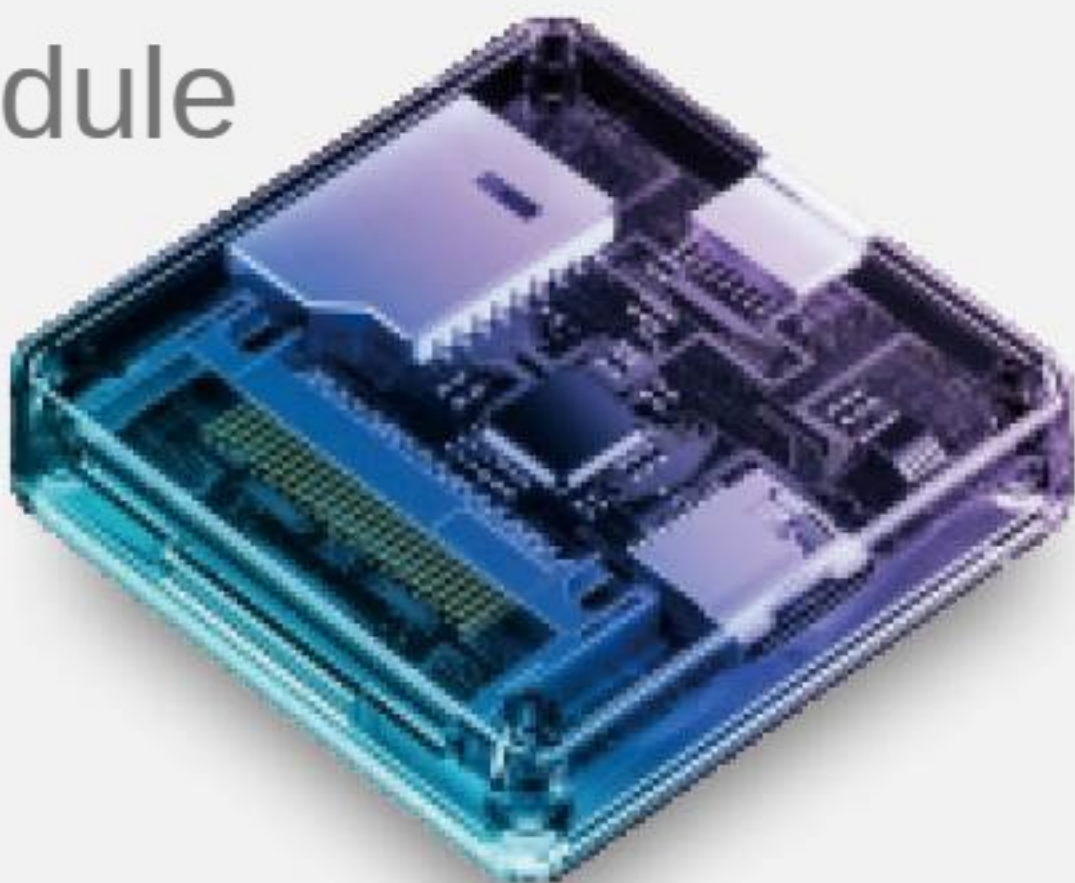

Intelligent Induction module

Real-time monitoring of indoor

TVOC \ PM2.5 \ PM10 \ temperature

and humidity display

Triple filtration efficient purification

Two-way G4 initial effect filtering,

F9 medium-effect filtering,

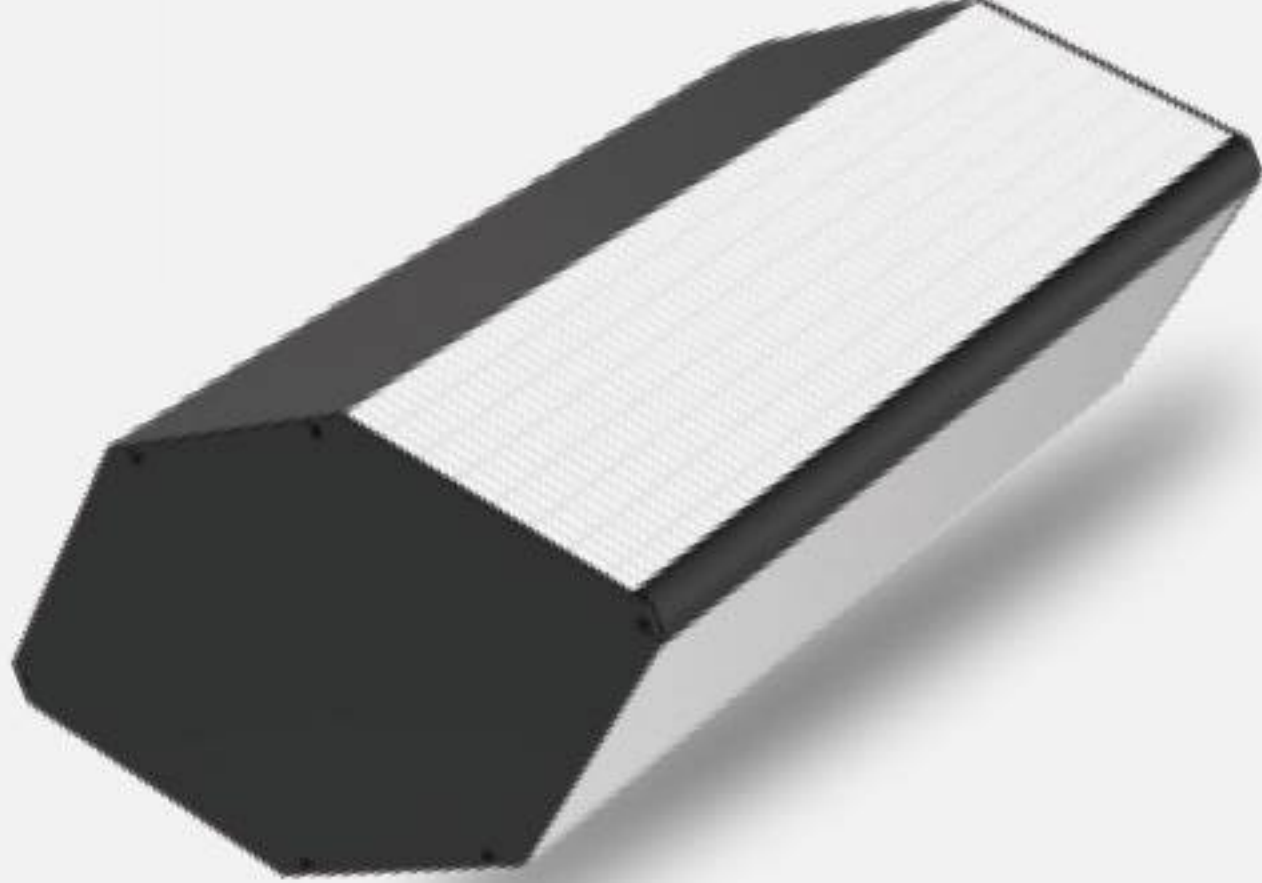

H13 efficient filtering

Heating recovery rate up to 82%

Imported antibacterial grade nano paper film,

Resin Frame efficiently solves energy loss

Adopt modular overhaul

The motor, heat exchange core, filter screen, air valve and other modules can be pulled and repaired on the same side, which is convenient for maintenance and repair.

UV Efficient Sterilization

.Carry out UV efficient sterilization treatment on the air sent into the room outdoors,

The sterilization rate reached 99.99%,

Medical level is safer

Product Parameters

Villa/large flat floor · Smart HEPA Heat Energy Recovery Ventilators (DC)

Model	Air volume (m³/h)	Power supply (V/Hz)	Rated Power (W)	Maximum static pressure (Pa)	Heating recovery rate (%)	Noise dB(A)	Dimensions (mm)	Air outlet connector (mm)	Applicable building area (m²)
